

BCT4SMEs

High level knowledge awareness of BlockChain Technology applications in SMEs

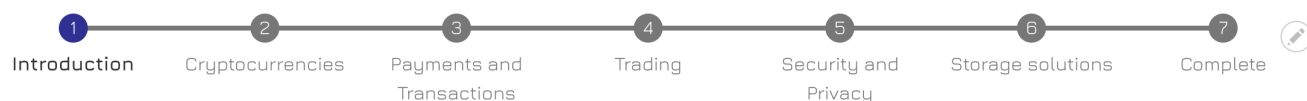

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

**The consortium of BCT4SMEs has finalised the project main result:
the Blockchain Implementation Assistant.**

The BIA is a personalised learning tool. This tool, widely accessible online, will be able, based on a user's response to a series of questions, to identify potential actions that this user could take based on the needs and capacities that can be inferred from their responses. In this way, and through an additional system of achievement and recognition, the project hopes to help SMEs empower themselves and reach greater growth and success.

BIA

Welcome to the Blockchain Implementation Assistant!

In a moment, when you click "Start!" button below, you will be presented with a number of questions about your knowledge on blockchain technology and its features. These questions will help the BIA create personalised recommendations for you, so that you can focus your efforts on implementing actions that are particularly well-suited to your business' situation and needs.

Let's begin!

Start!

BIA Strategy

The following strategy has been formulated, based on your latest responses to the questionnaire.

Cryptocurrencies

- 1.1 Introduction to cryptocurrencies
